Subject: RE: Dioxane-TCE Wells Forensic Study (3).docx
Attachments: removed.txt

Stan – The lab will be directed to perform CSIA (for TCE or 1,4 Dioxane) if there is enough mass to perform the test (and conversely not perform CSIA if there is not enough mass). If there is not enough mass in the sample, it is just a waste of resources because no useable data will come from it. It appears that there are no real objections to the list of wells. The Navy wells will be sampled on Thursday Feb 18 and the Grumman wells will be sampled on Friday Feb 19. Thanks to all for their cooperation. Jim H

Subject: RE: Dioxane-TCE Wells Forensic Study (3).docx

Please just add a yes for CSIA on well BCP MW4-1 for both TCE and 1,4 dioxane. Also just a suggestion: Why not collect and analyze (CSIA) TCE and 1,4 dioxane for all wells being sampled regardless of past results. If you are going through the effort, I don't see the harm. Thank you.

Stan Carey, Superintendent
Massapequa Water District

Concentrations in BCPMW4-1 and GM73D2 revised based on NG's spreadsheet. All wells are still proposed to be sampled
